What is happiness? Why are some people happier than others? This new edition of The Psychology of Happiness provides a comprehensive and up-to-date account of research into the nature of happiness. Major research developments have occurred since publication of the first edition in 1987 and here they are brought together for the first time, often with surprising conclusions. Drawing on research from the disciplines of sociology, physiology and economics as well as psychology, Michael Argyle explores the nature of positive and negative emotions, and the psychological and cognitive processes involved in their generation. Accessible and wide-ranging coverage is provided on key issues such as: the measurements and study of happiness, mental and physical health; the effect of friendship, marriage and other relationships on positive moods; happiness, mental and physical health; the effects of work, employment and leisure; and the effects of money, class and education. The importance of individual personality traits such as optimism, purpose in life, internal control and having the right kind of goals is also analysed. New to this edition is additional material on national differences, the role of humour, and the effect of religion. Are some countries happier than others? This is just one of the controversial issues addressed by the author along the way. Finally the book discusses the practical application of research in this area, such as how happiness can be enhanced, and the effects of happiness on health, altruism and sociability. This definitive and thought-provoking work will be compulsive reading for students, researchers and the interested general reader.
Stefan Klein, 2006, Psychology, 297 pages. A leading German science journalist draws on the latest findings in neuroscience and neuropsychology to explain the biological purpose and feasibility of happiness, in an.

Happiness, Pleasure, and Judgment The Contextual Theory and Its Applications, Allen Parducci, 1995, Self-Help, 225 pages. The essential idea of this book is that the happy life is one in which the best of whatever is experienced comes relatively often, regardless of how good that best might be.
